The Power of Dreams

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from them on request. This publicity material applies to the UK only Trade Descriptions Act (1968). Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer especially if your model selection is dependent upon one of the features advertised.

# CR-V

## HYBRID

**HONDA**

# THE HYBRID YOU CAN FEEL

---

The all-new CR-V Hybrid offers the sporty drive of an SUV with the fuel efficiency and low emissions of a hybrid powertrain.

The magic of Honda's intelligent multi-mode drive (i-MMD) system means that reducing fuel consumption doesn't mean sacrificing driving pleasure. In fact, the hybrid powertrain gives you a responsive drive by delivering enhanced power when you need it - as well as the ability to run silently in electric drive mode. All this technology delivers a dynamic drive that we call Honda Hybrid Performance.

# EFFICIENCY YOU CAN SEE

---

The CR-V offers you real world efficiency without placing any limit on your driving pleasure. To do this Honda's i-MMD operates in one of three modes or combination of modes, automatically selected to optimise efficiency and performance for the prevailing conditions.

Engine drive, as the name implies, is when the 2.0 litre petrol engine is powering the car - such as during sustained high-speed motoring; hybrid drive is when the petrol engine and electric motor are sharing the work, for example when accelerating; and EV drive mode is when the car is running 100% on silent electric power. This will usually be when accelerating from standstill or low speed cruising.

i-MMD is convenient. Because it creates its own electricity, you'll never have to plug in your CR-V. It self-charges by direct power transfer from the petrol engine and by harvesting otherwise-wasted energy when braking.

# TECHNOLOGY YOU CAN TRUST

---

Honda was the first manufacturer to introduce hybrids to Europe in 1999. Since then we've offered hybrid powertrains across the range, even integrating one into our top-of-the-range NSX supercar. Honda has been at the forefront of the hybrid revolution for over 20 years with millions of vehicles in service and the confidence to give each CR-V Hybrid a 5-year powertrain warranty, giving you further peace of mind.

## ACCESSORIES

Make it yours: Personalise your CR-V Hybrid with our wide range of accessories. The Style Pack gives your car an even more dynamic look with a combination of refined colour-keyed features.
